September 2011

GREEN SCREEN VIDEO MAGIC

Greetings!

I am now offering Green Screen.

What is Green Screen?

In the simplest terms; it allows us to video a person in front of a green background and replace the background with any image we like. We can place a company logo, a graphically generated image, a jpeg or a moving video clip. We can also do a combination of any of these elements.

In a studio setting, we light the subject and background, we take your script; which we can assist you in creating and place it on our teleprompter. The teleprompter allows you to take your script copy and download it to our computer. We then generate the script on a screen that can be read directly as our subject looks directly into the camera.

Professional mic'ing and camera complete the process. We can work with what imagery our clients have for placement in the background or we can provide you with a selection to choose from.

We will provide you with a professional looking video for placement on your homepage.

Do you want your next video to get results? If you want to hold the attention of your next client, perhaps you need something a little more amazing. Our green screen technology may be it. Imagine if right behind you, your viewers could see your logo larger than life? What if they could see photos and video of you and your products and your services?

Some Thing to Take Away

Video is a memory maker
and keeper!

Consider all the visuals you
process of your family and
friends, photos, computer
files, flash cards, videotape,
film, slides.

Why not put all that in one
convenient place?

We can place all this on a
DVD and the internet, or
back it up on a memory
stick.

While we are at it we can
add titles, effects, music
and narration.

In your short Web Video Infomercial while your audience is getting to know, like, and trust you, they are seeing with their own eyes first hand how you can solve their problems. It's very powerful. The advantages of adding green screen technology to your Web Video Infomercial could be a great investment for you.

Are you ready to get more customers and make more sales? Try our new green screen technology.

Videos range from 30 to 90 seconds.
Price range is \$300 to \$700 dollars
Prices for longer videos quoted per video

-
Sincerely,

-
David Cooperstone
