

Transfer Me Please...

You got some old video tape lying around?
How about a ton of slides and/or old
photographs
Even some old motion picture 8 mm or super
8 film.

Here are 10 reasons you may want to
transfer that material to a digital format as a
DVD, Memory Stick or Hard Drive.

1. To simply view what you have, that VHS machine or old 8mm camera is toast so how can I watch what I got?
2. To condense space and place all that material on one single item.
How much space does 10 VHS tapes take up verses 10 DVDS?
3. To preserve those memories. On video tape it will not last much longer.
4. To add music to make viewing more enjoyable.
5. To add titles to make it all clearer and more informative.
6. To add narration to make it more personable.
7. To enhance the quality though a digital conversion.
8. To combine all that media on too one medium.

At Another ESN Event

Some Thing to Take Away

10 reasons to hire a Professional Videographer

- Experience
- The right equipment
- Knowing how to get your message or event across
- Having back up...Gear and personal
- Having the right resources to get the job done right
- Help place the video on the Internet
- Being polite and indiscrete

The Studio presents
**The Magic of Video
Green Screen**

What is Green Screen?

- In the simplest terms- it allows us to video a person in front of a green background and replace the background with any image you like
- We can place a company logo, a graphically generated image, a jpeg or a moving video clip.
- In a professional studio setting, we light the subject and background
- We take your script, which we can assist you in creating and place it on our teleprompter.
- Professional mic'ing and camera complete the process.

All post-production and uploading to the web is included.

We will provide you with a professional looking video for placement on your homepage, to use in a video blog and/or to e-mail to your clients.

\$ Reasonably priced at only \$300 for 30 minutes or \$500 for one hour

How We Produce A Web Video

1. Consult with Client
2. Write a Outline-script
3. Shoot on Location
4. Arrange and shoot video testimonials
5. Edit the first draft, include EDL (edit decision list) form for client to indicate what he like in draft 2 (Drafts are sent out via You Tube, private settings
6. Create draft 2 and continue to refine the video until approval
7. Titles, graphics and music are added near the end of this process
8. Finish final version and place on various social media sites YouTube, Vimeo, Facebook, LinkedIn
9. Working with web site management, video is placed or linked to client web site
10. DVD copies delivered
